

THE
CAMEL SOAP
FACTORY

White Label & Custom Soap Manufacture

If you'd like to offer your customers a high-quality natural soap, crafted right here in the Middle East - we think we can help.

The Camel Soap Factory provides a variety of white label and customised soap options to meet your needs.

LET THE CAMEL SOAP FACTORY BE YOUR SOAP FACTORY

We specialize in high quality soap manufacture, containing natural ingredients. Whether you start with one of our existing hand-crafted or milled soap bases or require a customised soap that meets your specific requirements, we have the expertise and experience to help.

In just five easy steps, we can help you to design your own customised soap.

STEP 1. DECIDE ON HANDMADE OR MILLED, AT THE CAMEL SOAP FACTORY WE MAKE BOTH.

Handmade Cold Process Soaps

Our handmade cold-process soaps are made the old-fashioned way: - with love and careful attention to quality. We use no machines, instead we handcraft in small batches using the centuries old cold process method. We use no heat in making our soaps which ensures that none of the goodness and healing properties of our pure ingredients is destroyed.

As with many good things in life, the cold process method is really quite simple. We mix our oils and fresh camel milk together with a saponification agent which starts the process of turning these raw ingredients into our gorgeous soaps. As the raw ingredients start their journey to becoming a natural soap (a process known as saponification), we gently blend in the finest natural essential oils that give our soaps their fabulous fragrance and aromatherapy properties.

Once the ingredients are blended, and while still in liquid form, the mixture is poured into large square moulds in which the liquid will settle and solidify. Once solidified, the soap is turned out and the blocks are hand cut to size and your logo stamped. At this stage the bars are moved into a climate controlled drying room in which they are left for four weeks to air dry and harden.

Only once the bars are cured, and only if we're completely satisfied with the quality of the batch, are they hand packed into your packaging.

Things to consider when deciding to go handmade:

- These are the gentlest soaps for the skin and if you're looking to sell a natural product then this is a great option.
- Cold process soaps are soft soaps compared to the commercial ones you may have used in the past. Drying out on a good soap dish between uses, will really extend their life.
- The soaps are made by hand, therefore there are limits to how many can be produced at a time. You should bear this in mind in terms of your future

business and your target market. We are unique as a company in being able to offer extensive handmade options and volumes.

- Not all fragrances work with cold process soaps, so if you have your own fragrance, we would need to test that it is compatible with the cold process soap.
- The soaps can be poured either into large moulds, which are then cut into bars, or we can pour into smaller moulds for single soaps. The small molded soaps can reflect different shapes but can be costly as each soap needs to be hand poured. This also limits the volumes that can be made at any one time but will give you your own unique shape. We can help put you in touch with mould makers if this is route you wish to take.

Milled soaps

The initial chemical saponification process is the same, but we start the process with a high quality pre-made base. This makes the process a little more cost effective, especially for larger volumes. Fragrances and colours are also added at the beginning of the milling process which means it is easier to incorporate your fragrance into the soap. This way, by the time it comes to the milling, the added ingredients are well mixed and evenly distributed.

To smooth it out and ensure a hard and luxurious texture, the base is put through our milling machines and turned into a soap bar. It is an artful process.

In a nutshell, here are the differences between a milled soap and a handmade soap.

- The milled soap is smoother and more refined than a handmade soap
- Milled soap is denser and consequently lasts longer than a handmade bar
- Each bar will be consistent in colour, fragrance and texture
- As the soap is processed mechanically, cutting and stamping can be automated which allows for larger batch sizes to be made.

Handmade Cold Process Soaps

For your convenience, we've formulated three standard soap bases that have been tried and tested.

Pure and Simple: A mild and moisturising soap base that is formulated from the finest food grade Olive Oil. With its roots in the very traditions of soap-making our Pure and Simple soap base is a low-foaming, soap, but one that is particularly gentle and suitable for daily use on hands, body and face.

Foaming: We add coconut oil to our pure and simple soap base to deliver a harder, longer lasting and higher foaming soap. Still gentle and moisturising, our foaming soap base is ideal for everyday home use.

Moisturising: With added shea-butter, our moisturising soap base is our most popular. A hard and long-lasting soap with a rich lather that nourishes and protects the skin from harsh climates. It's the perfect soap with which to wow your customers.

+ Camel Milk. Our most luxurious recipes include locally sourced fresh camel milk or high-quality dried milk powder. Rich in lanolin and skin pampering nutrients including Alpha Hydroxy Acids and Antioxidants, camel milk helps to nourish the skin, lock in its natural moisture and keep it looking young and fresh.

Milled soaps

We stock two standard bases for milled soaps. As part of our commitment to sustainability and the environment, all bases are sourced from sustainable sources.

Palm Free: We are very unique in being able to offer a palm oil free base which is based on rapeseed, sunflower and coconut. This beautiful base is an off- white colour and produces a long-lasting hard bar.

Palm based: We also offer RSPO certified palm oil/palm kernel base. This has cost advantages over the palm-free base. It is an off-white coloured base which offers a great lather.

Both bases contain chelates for stability and preservation.

STEP 3. CHOOSE YOUR AROMAS OR CREATE YOUR OWN.

We use only the purest essential oils, carefully chosen for their skin benefits, to create our own aromas. We keep a standard set of essential oils in stock but can source others on your behalf should you require and can assist you to create your own blend.

If you have your own aroma, either an essential oil blend or a fragrance, that you'd like to use in your soap, we can do this. We do suggest that we conduct stability tests of the aroma in your chosen soap base as the saponification process can modify the scent and some essential oils and fragrances can cause the soap base to behave in unpredictable ways.

We typically hold stock of essential oils is shown below, but please check with us as this list does vary.

- Amyris Oil
- Bergamot Oil
- Black Cumin Seed Oil
- Black Pepper Oil
- Cedarwood Oil
- Cinnamon Leaf Oil
- Coriander Russian Oil
- Cypress Oil
- Elemi Oil
- Eucalyptus Oil
- Grapefruit Oil
- Ho Wood Oil
- Lavender 40/42
- Lemongrass Oil
- Lemon Oil
- Mandarin Oil
- Palmarosa Oil
- Patchouli Oil
- Peppermint Oil
- Rosemary Oil
- Rose Geranium Oil
- Sweet Orange Oil
- Tea Tree Oil

In addition to our essential oils, we also keep a supply of fragrances that can be added to your soap. These include:

- Mukhallat
- Musk
- Aromatic Wood
- Oud

STEP 4. ADD ANY SPECIAL INGREDIENTS.

We've created many custom soaps which include special ingredients, including Activated Charcoal, Himalayan Salt and Spirulina. Discuss your ideas with us and we'll help to make them real.

STEP 5. DECIDE ON THE SIZE AND LOOK OF YOUR SOAP BAR.

Your final step is deciding the size you'd like your soap cut to. We provide a standard set of sizes that can be used

If you require, we can also stamp a logo into the soap. You provide your logo or design, and we'll have the stamp manufactured ready to personalize your very own soap.

HOW WE PRICE OUR CUSTOMIZATION SERVICES

Our pricing is based on the specific choices you make in creating your soap and the quantity and frequency of manufacture that you require. Please contact us for a comprehensive quotation.

We do not specifically become involved with the design of your packaging; however, we are in contact with a number of designers with packaging experience and are happy to connect you with them.

Five easy steps to a personalised soap that reflects your brand, your vision.

ABOUT THE CAMEL SOAP FACTORY

The Camel Soap Factory is based in the UAE and offers a range of natural skincare products. Inspired by the traditions of Arabia, our products are kind to your skin and to the environment, incorporating regional ingredients that pay homage to the essence of Arabia.

While we are the world's largest manufacturer of natural soaps made with fresh camel milk, we delight in delivering a personal experience to you. We offer you a contemporary take on the traditions of Arabia, wherever you are in the world and whatever your product.

Despite its rapid growth trajectory, The Camel Soap Factory remains committed to producing handcrafted, natural, ethically produced and environmentally friendly products of the highest quality.
